RECORDS MANAGEMENT AND E-RECORDING

Mobilis Technologies is a trusted leader in government records management and e-recording software solutions for a county recorder's office. iRecord records management works well in Recorder's offices of any size. It's the perfect easy-to-use tool for government records management and document storage. iCounty e-recording solution delivers co-operative integration into many land record systems to enable submitting and recording of records and much more!

MOBILIS SERVICES

Mobilis Technologies consulting & managed services are focused on delivering high quality, scalable business process management (BPM), software development, and e-recording services. Our service solutions improve access to information, increase workplace efficiency, reduce operating costs, improve customer service, and deliver scalable software development solutions. We deliver value that is real with a measurable return on investment. But most of all, we provide customers with solutions that fully address their original goals and ensure complete satisfaction.

iRecord
RECORDS MANAGEMENT

iRecord is an easy-to-use government records management system and document storage system for Recorder's offices. Its ease-of-use and configurable design makes it flexible enough to work well in both small and large Recorder's offices.

iCounty
ELECTRONIC RECORDING

iCounty is a trusted electronic recording (e-recording) software platform for submitters and recorders with a co-operative approach. This web-based platform enables submitters to securely transmit documents using any electronic recording system and county recorders to receive documents for recordation.

Services
CONSULTING

Through our Software Development and Business Process Management (BPM) services, Mobilis Technologies offers innovative software solutions and provides streamlined, efficient, and well-managed business services to improve performance, increase revenue, and assure customer satisfaction. With the combined experience of software development and BPM, our team has the expertise to help meet your delivery targets.

Services
MANAGED

Managed Services from Mobilis Technologies offers a comprehensive list of services to support your county's archival requirements, convert from paper to digital formats and support your day to day operation needs. Partnering with Mobilis to provide these services is cost effective and allows you to focus on your core business.

ABOUT MOBILIS TECHNOLOGIES
